

should not be included in a separate species VI of the invention as referenced in the Office Action. On the contrary, Figures 1 and 15 illustrate alternate means for support for Applicant's rotational filing system, so that Species I and VI are includable as one Species of invention. Claims 12 and 13 include the disk-like pouch of the invention, the essential distinction being that the claimed common axis of rotation can be on a horizontal plane (Claim 12) or vertical plane (Claim 13).

Furthermore, new Claims 14 and 15 have been added to claim the disk-like pouch, itself, illustrated in the embodiments of Figures 10 and 11 of the Specification and included under Species I. (Figures 10 and 11 are included in reference to Species I in the Office Action). Therefore, Applicant submits that the proper claims readable on his Election are claims 11-15 of the Preliminary Amendment submitted herewith.

Based upon the foregoing, Applicant request that an Office Action issue on the merits of Claims 11-15 of the Preliminary Amendment.

Respectfully submitted
